Creating custom displays using ION Setup

You can use ION Setup to program new custom displays.

1. Start ION Setup.

2. Open the Setup Assistant for your meter.

3. Navigate to Custom Displays.

4. Select Custom Displays from the Front Panel tab and click Edit. ION Setup loads your meter's display information into the Display Editor screen.

5. Rename, delete, or change the order of custom displays through the Display Editor screen. Click New to add a new display. Click Edit to bring up the Display setup screen, where you can configure new or existing custom displays.

6. Configure your screen.

Screen Type: Specify the number of parameters displayed on the screen.

Screen Title: Enter the title to be shown at the top of your custom display.

7. Click Edit to select the displayed parameters. The number of parameters displayed is determined in the Screen Type selection described above.

8. Select your digit display properties.

Resolution: Specifies the number of decimal places displayed.

Last Digit: Enter the title to be shown at the top of your custom display.

9. Click Send to save the changes in the meter.
